Assembly instructions for: **LUNA TREE BENCHES**

Thank you for purchasing Forever Redwood patio furniture. Forever Redwood is built by Old-Growth Again Restoration Forestry (OGA). OGA is dedicated to restoration forestry. Sales of patio furniture finance our restoration work in California redwood forestlands.

Tools required: ½-inch ratchet and a mallet or small hammer.

The Tree Bench ships in 18 parts: Six back rests, six legs and six seats. 24 - 3 ½” long stainless steel carriage bolts with washers and nuts are included to assemble your set.

The Tree Bench parts attach with carriage bolts. All parts have numbers written next to pre-drilled holes. Just match up the numbers. For example, a leg with the number 14 next to a pre-drilled hole is to be attached to the backrest with the same number, the opposite part will be marked with an X.

Quantity	Description	Drawings
Quantity will vary depending on size	Backrest	
Quantity will vary depending on size	Seat	
Quantity will vary depending on size	Legs	
Quantity will vary depending on size	Bolts 5/16 x 5 1/2”	

Step 1: Place your parts on a level clean surface. If you take a few minutes to order and then place all the parts as shown above the assembly will be simple and be accomplished in less time. Your Tree Bench was fully assembled before being broken down for shipping. All the parts fit. Gently tap the bolts all the way into the wood (to set in place) then add a washer and lightly tighten. Do not over tighten or you'll crush the wood and weaken the structural strength of your set. If you are forcing a bolt into place, you either have the wrong part or it is not aligned or it is turned around.

Step 2: Take the seat marked as number 1 and place it between the 2 legs, then attach the parts with 2 bolts on each side as shown below.

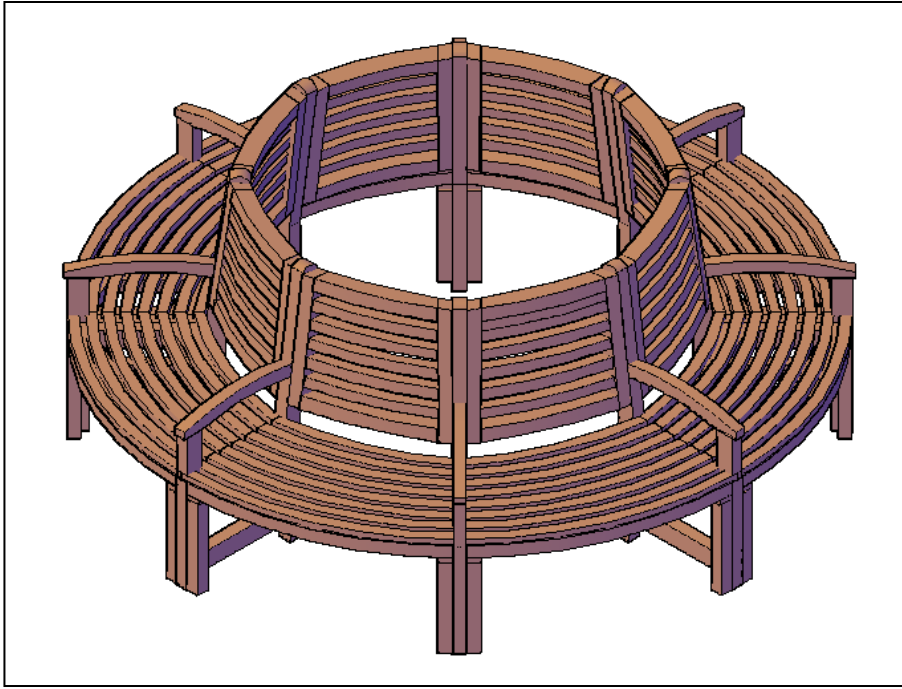

Once finished the seats will look this way

Step 3: Attach the Backrests with 2 bolts each, washer and nuts, on each side, as shown in the next photo.

Thank you! If you have any questions, please call or email us.
